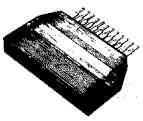
STK8260 Ⅱ



Thick Film Hybrid Integrated Circuit

60W min AF Power Amp. Output Stage (Dual Supplies) With Built-in Quasi Class A Bias Circuit

Features

1. Switching distortion peculiar to class B amp. is zero.
2. Since power stage, bias controller, and temperature compensator are incorporated on the IMST substrate having good thermal conduction, no complicated temperature compensation using thermistor, etc. is required, thereby enabling good thermal stability.
3. By setting bias current externally, optimum conditions can be set.
4. 3-stage Dralington power pack.
