PIN CONFIGURATION

FUNCTIONAL DIAGRAM

One SPST Switch per Package.
Switch shown in Logic '1' Input Position.
Logic '0' ≤ 1.0V
Logic '1' ≥ 4.5V

NOTE: All devices contain diodes to protect inputs against damage due to high static voltages or electric fields; however, it is advised that precautions be taken not to exceed the maximum recommended input voltages. All unused inputs must be connected to an appropriate logic level (V_{DD} or GND).
