

TOSHIBA CMOS Digital Integrated Circuit Silicon Monolithic

TC74HC697AP, TC74HC697AF

Synchronous Presetable 4-Bit Binary Up/Down Counter with Output Register (multiplexed 3-state outputs)

The TC74HC697A is high speed CMOS UP/DOWN COUNTERS fabricated with silicon gate C²MOS technology.

It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

It counts on the rising edge of the Counter Clock (CCK) input when "counter mode" is selected. If the up/down (U/D) input is held high, the internal counter counts up. Conversely, if U/D is held low, it counts down.

The internal counters outputs are latched into the output registers on the rising edge of the Register Clock (RCK) input.

The outputs (QA~QD) are selected as either internal counter or registered outputs by the output select (R/C) input. When high, the outputs are counter outputs and when low, they are registered outputs.

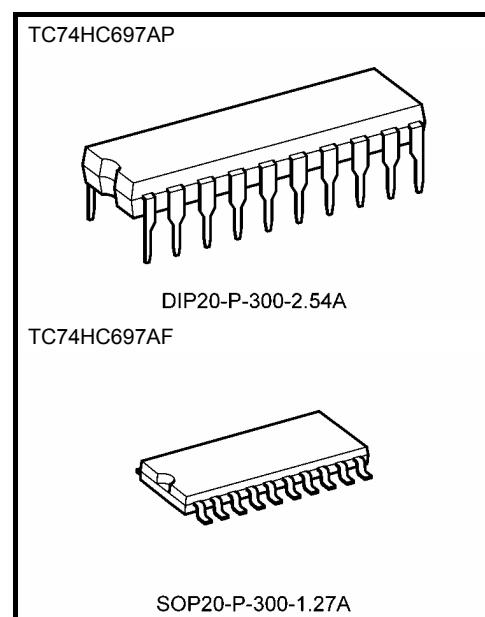

Two enable (ENP, ENT) inputs and a carry (RCO) output are provided to enable cascading of the counters.

This facilitates easy implementation of n-bit counters without using external gates.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.

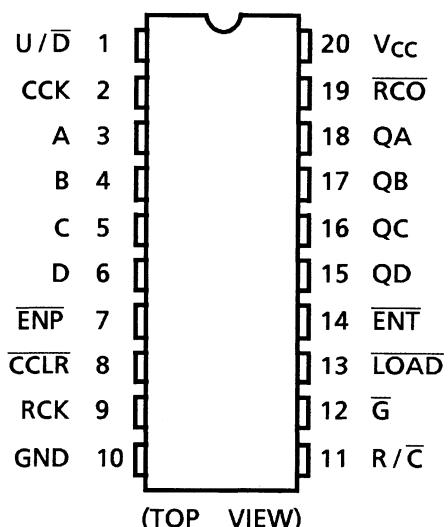

Features

- High speed: f_{max} = 38 MHz (typ.) at VCC = 5 V
- Low power dissipation: I_{CC} = 4 µA (max) at Ta = 25°C
- High noise immunity: VNIH = VNIL = 28% VCC (min)
- Outputs drive capability: 15 LSTTL loads for QA~QD
10 LSTTL loads for RCO
- Symmetrical output impedance:
|I_{OH}| = I_{OL} = 6 mA (min) for QA~QD
|I_{OH}| = I_{OL} = 4 mA (min) for RCO
- Balanced propagation delays: t_{pLH} ≈ t_{pHL}
- Wide operating voltage range: VCC (opr) = 2~6 V
- Pin and function compatible with 74LS697

Absolute Maximum Ratings (Note 1)

| Characteristics | Symbol | Rating | Unit |
|---------------------------------------|------------------|------------------------------|------|
| Supply voltage range | V _{CC} | -0.5~7 | V |
| DC input voltage | V _{IN} | -0.5~V _{CC} + 0.5 | V |
| DC output voltage | V _{OUT} | -0.5~V _{CC} + 0.5 | V |
| Input diode current | I _{IK} | ±20 | mA |
| Output diode current | I _{OK} | ±20 | mA |
| DC output current (RCO) (QA~QD) | I _{OUT} | ±25 ±35 | mA |
| DC V _{CC} /ground current | I _{CC} | ±75 | mA |
| Power dissipation | P _D | 500 (DIP) (Note 2)/180 (SOP) | mW |
| Storage temperature | T _{STG} | -65~150 | °C |

Note 1: Exceeding any of the absolute maximum ratings, even briefly, lead to deterioration in IC performance or even destruction.

Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings and the operating ranges.

Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook ("Handling Precautions"/"Derating Concept and Methods") and individual reliability data (i.e. reliability test report and estimated failure rate, etc.).

Note 2: 500 mW in the range of Ta = -40 to 65°C. From Ta = 65 to 85°C a derating factor of -10 mW/°C shall be applied until 300 mW.

Operating Ranges (Note)

| Characteristics | Symbol | Rating | Unit |
|--------------------------|---------------------------------|--|------|
| Supply voltage | V _{CC} | 2~6 | V |
| Input voltage | V _{IN} | 0~V _{CC} | V |
| Output voltage | V _{OUT} | 0~V _{CC} | V |
| Operating temperature | T _{opr} | -40~85 | °C |
| Input rise and fall time | t _r , t _f | 0~1000 (V _{CC} = 2.0 V) 0~500 (V _{CC} = 4.5 V) 0~400 (V _{CC} = 6.0 V) | ns |

Note: The operating ranges must be maintained to ensure the normal operation of the device.
Unused inputs must be tied to either V_{CC} or GND.

RESTRICTIONS ON PRODUCT USE

20070701-EN GENERAL

- The information contained herein is subject to change without notice.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc.
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in his document shall be made at the customer's own risk.
- The products described in this document shall not be used or embedded to any downstream products of which manufacture, use and/or sale are prohibited under any applicable laws and regulations.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patents or other rights of TOSHIBA or the third parties.
- Please contact your sales representative for product-by-product details in this document regarding RoHS compatibility. Please use these products in this document in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances. Toshiba assumes no liability for damage or losses occurring as a result of noncompliance with applicable laws and regulations.
