

## 24×48 dot matrix unit

### LUM-115HMU307

The LUM-115HMU307 is a 24×48 dot matrix display which can be used in a wide range of applications, including alphabet, numeric, symbol and graphical displays. A large display can be easily created by arranging a number of these dot matrix displays in an array, and they can be applied to a variety of display purposes. A custom LSI controller has display data memory for two screens, and data for each screen can be written and displayed in turn.

#### ●Applications

Light source for displays

#### ●Features

- 1) 24×48 dot matrix.  
Shape of emitting section : □2.0×2.5
