Monolithic Linear IC

L88M00T Series

3.3 to 12 V, 0.5 A Low Dropout Voltage Regulator

Overview

The L88M00T Series are low dropout voltage regulator ICs with output current of 0.5 A. Because they can operate with a low input-output voltage difference, they contribute to smaller and more efficient set power supplies, and are optimum for audio-visual and office automation equipment.

Functions and Features

- Output voltage ~~L88M33T: 3.3 V~~ L88M05T: 5 V ~~L88M09T: 9 V~~ ~~L88M12T: 12 V~~
- 500 mA output current
- Low minimum input-output voltage differential (0.4 V typ) enables to save energy and miniaturize transformer size.
- Set size can be miniaturized with compact TP-3H power package.
- Surface mounting on board permits allowable power dissipation to be raised.
- Enhanced mount flexibility with range of formed products.

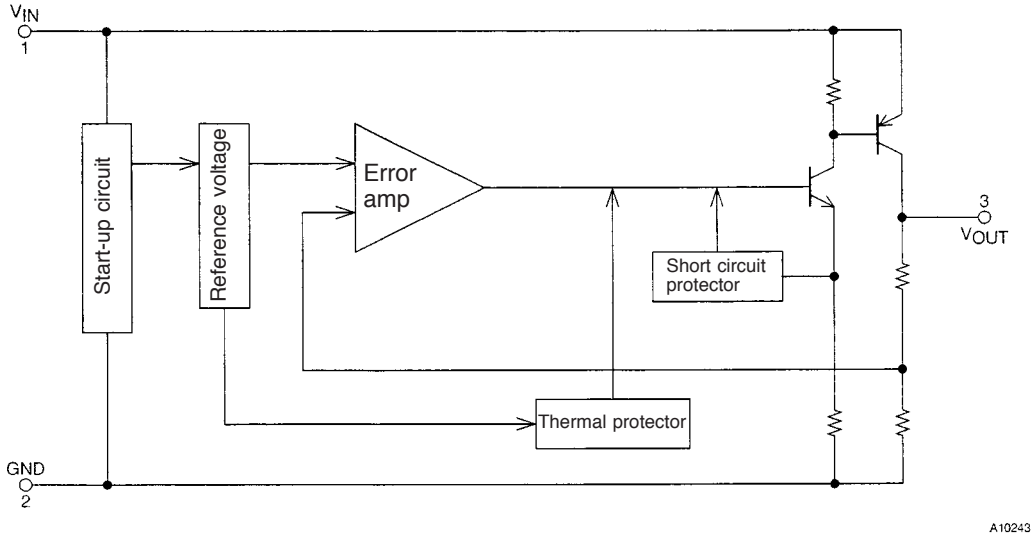
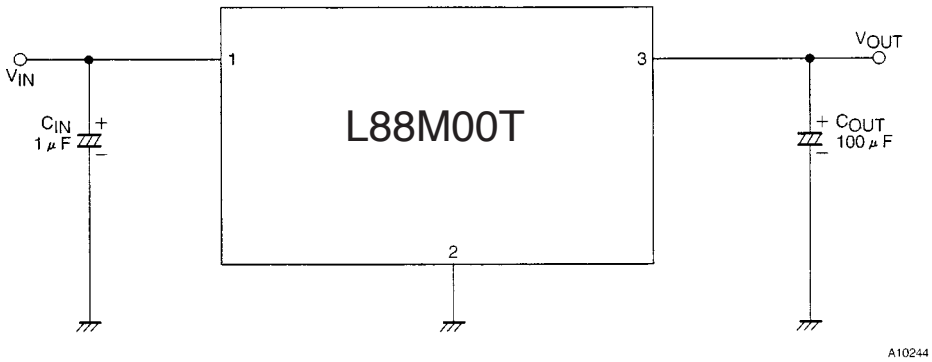
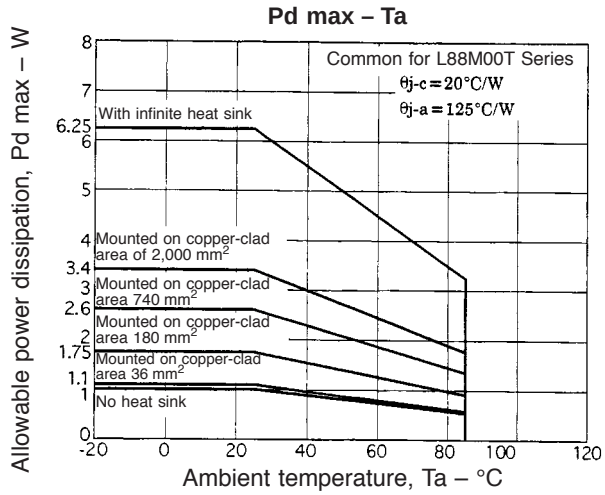
Equivalent Circuit Block Diagram (Common to L88M00T Series)



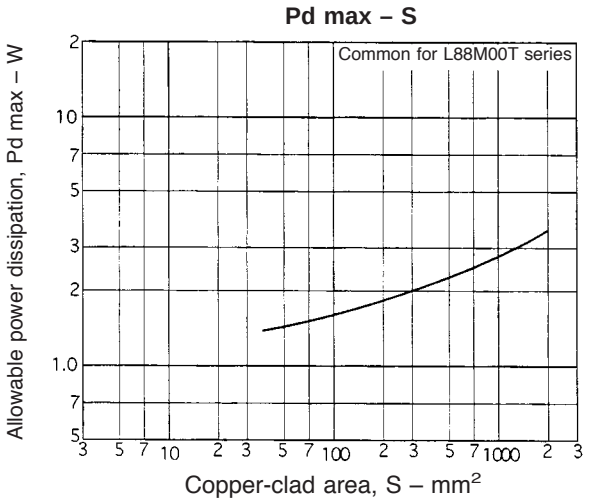
Test Circuit (Common to L88M00T Series)

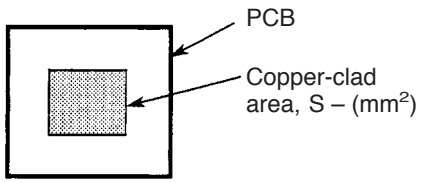


Notes: 1. To ensure operational stability, C_{IN} and C_{OUT} should be placed as close to the IC as possible.
2. Because the output capacitor C_{OUT} is set at over 100 μF to prevent oscillation at low temperatures, a capacitor that exhibits little change in capacity with temperature variations should be used (such as a tantalum capacitor).
3. When V_{IN} is minus (–) and GND is plus (+) (reversed connection), excessive current flow will occur.



1) The allowable power dissipation is 1.0 W (Ta = 25°C) with no fin attached, but when mounted on a hybrid IC board or printed circuit board, high allowable power dissipation is achieved, despite the compact package.
The graph below depicts the relationship between the copper-clad area and allowable power dissipation when mounted on a glass epoxy board ($50 \times 5\,0 \times 0.8$ tmm^3) with a copper thickness of 18 μm.





2) Pd is the value for when the solder on the surface of the IC heat sink has melted completely and the surface mount is horizontal.
3) Please be advised that the flow solder application system (full-heat method) cannot be recommended.
