

## DC to DC Converters

### Distributed Power Supplies for Systems, Insulation Type

#### Full Brick Type iFA Series

Power supply systems for infrastructure devices used in communication networks primarily use brick-type DC to DC converters.

Some parts of these devices require mid output voltage and power.

We have developed a lineup of full brick types to meet these requirements.

#### FEATURES

- Wide input voltage range (DC.36(Partial: 37V) to 75V or DC.18 to 36V)
- Our lineup includes products for outputs of 12V and 28V at 420W, 500W and 600W
- High efficiency: 90 to 91%
- The heat sink can be installed (Depend on an environmental condition).
- Remote ON-OFF function
- Output voltage external variable function
- Remote sensing function
- Parallel operation
- Various protective functions

#### PRODUCT IDENTIFICATION

iFA	48	042A	120V	-○○○
(1)	(2)	(3)	(4)	(5)

(1) Type name

iFA: Full brick type

(2) Rated input voltage

(3) Output current

(4) Output voltage

(5) Option code

000: Standard (13 pins for the "Power Good" signal,  
Pin length: 3.68mm)

001: 13 pins for the "Power Good" signal,  
Pin length: 2.79mm

002: 13 pins for the OVP signal,  
Pin length: 3.68mm

003: 13 pins for the OVP signal,  
Pin length: 2.79mm

#### PART NUMBERS AND RATINGS

Output voltage(V)	Current(A)	Part No.
12	42	iFA48042A120V
12	50	iFA48050A120V
28	18	iFA48018A280V
28	21	iFA48021A280V
28	15	iFA24015A280V

Auxiliary functions						
Overvoltage protection		Yes(Shut-down type)				
Oversupply protection		Yes(Automatic recovery)				
Power good		Yes				
Over-temperature protection		Yes(Automatic recovery)				
Remote ON-OFF		Yes				
Remote sensing		Yes				
Parallel operation		Impossible				
Output voltage adjustment		Yes				
Master slave operation		No				
Standards						
Safety standards		UL60950 and VDE0805 approved. EN60950 approved.				
Constructions						
External dimensions	mm	12.7×61.0×116.8[H×W×L]				
Weight	g	250max.				
Mounting method		Mounted from the terminal side (soldered).				
Oscillating method		Fixed frequency				
Oscillating frequency	kHz	200typ.	350typ.	155typ.	175typ.	175typ.

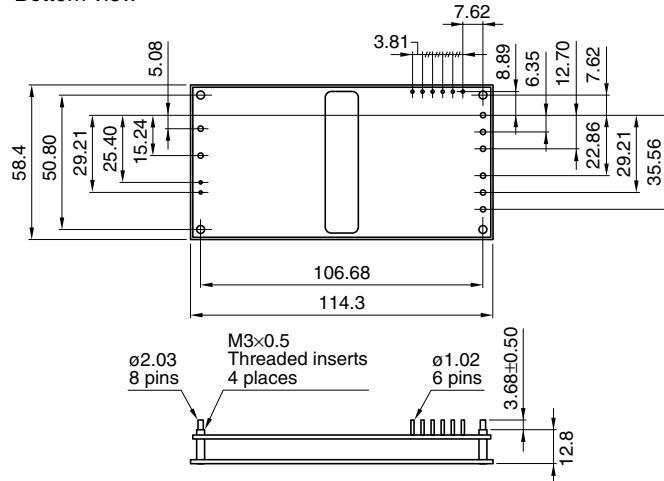

<sup>\*1</sup> Verify the rated current (maximum output current) because this involves derating.

<sup>\*2</sup> Applies only to the primary surge. The power supply does not have an input fuse, so make sure to install an external fuse when using this product.

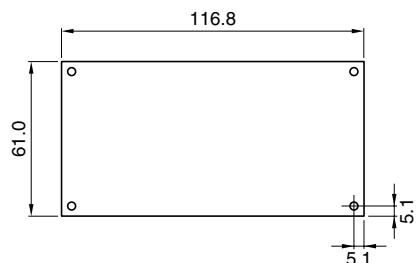

<sup>\*3</sup> Load step from 50 to 75% of Io max. with at least one 10µF ceramic capacitor and one 470µF low ESR aluminum or tantalum capacitor across the output terminals.
